

Abdul Hannan

Senior Java Backend Engineer / Technical Lead

Java 17/21 • Spring Boot • SQL & Databases • Microservices • Clean Code • Distributed Systems

Karachi, Pakistan | +92 343 2324 575 | ahannanhere@gmail.com

[linkedin.com/in/abdul-hannan-java-engineer](https://www.linkedin.com/in/abdul-hannan-java-engineer) | hancraft.tech

Relocation: Open to relocation to Katowice or Lodz, Poland; visa sponsorship welcome and able to relocate promptly after an offer.

PROFILE

Senior Software Developer with 10+ years designing and delivering complex, high-quality products in Java, Spring Boot and SQL. Strong across microservices, REST APIs, relational databases (PostgreSQL, SQL Server, MySQL) and event-driven systems, with a passion for clean, well-tested code, refactoring and performance optimization. Acts as a technical advisor and mentor to engineers, upholds coding standards and clear documentation, and collaborates effectively across local and international teams. Has delivered production systems across fintech, banking, tax and regulated compliance domains for European and US clients, and actively evaluates new technologies — including AI-assisted development — to build competitive products. Fluent in English (C2).

TECHNICAL SKILLS

Core & Frameworks: Java 17/21, Spring Boot 3, Spring Data (JPA), Spring Security, Microservices, REST APIs, gRPC, OO design, design patterns

Databases & SQL: PostgreSQL, SQL Server, MySQL, advanced SQL, Hibernate/JPA, Flyway, Liquibase

Integration & Messaging: Kafka, event-driven architecture, REST/SOAP & external-system integration, API design

Quality & Craftsmanship: Clean code, refactoring & optimization, JUnit, Mockito, unit & integration testing, code reviews, technical documentation, coding standards

DevOps & Tools: Docker, Kubernetes, Jenkins, GitLab CI, GitHub Actions, Maven, Jira, AWS, Azure, Google Cloud

Leadership & Innovation: Technical advisor & mentoring, distributed/international teams, evaluating emerging tech, AI-assisted development, LLM & agentic workflows (Claude, Gemini, OpenAI), Agile/Scrum

Frontend: Angular, React, Next.js, TypeScript, JavaScript

PROFESSIONAL EXPERIENCE

Taazaa Inc — Module Lead / Technical Lead (Java) | Remote, Pakistan / US client 07/2024 – Present

Civi Tax — AI-powered multi-tenant tax platform for high-volume tax filings across 50+ US localities.

- Deliver a complex multi-tenant tax platform end-to-end — design, development, testing, deployment and production support — as technical advisor within an 8-member agile team, shipping 2–3 releases per month.
- Designed a configurable rule engine covering 100+ locality-specific rules and refactored core services for maintainability, cutting new-configuration rollout from weeks to days.
- Built secure, scalable Java 17 / Spring Boot 3 microservices with PostgreSQL, event-driven patterns, Keycloak, Docker and Kubernetes, upholding coding standards and documentation.
- Introduced AI/RPA pipelines and evaluated new tooling to raise productivity, cutting per-filing processing time from ~5 min to ~20 sec.

Tech: Java 17, Spring Boot 3, Microservices, PostgreSQL, Kubernetes, Azure, Keycloak, GitHub Actions, Python, Gemini AI, UiPath Studio, RPA, Next.js

INK Solutions — Senior Java Developer | Poland / onsite Saudi Arabia 10/2022 – 07/2024

STC Bank — Merchant Portal supporting 8M+ users and 10k+ merchants.

- Designed and maintained Java 17 / Spring Boot 3 microservices for merchant onboarding, KYC workflows and digital banking services at high scale.
- Developed 50+ REST and gRPC endpoints and tuned performance, improving response times by ~25% through Redis caching.

- Built Kafka-based event-driven flows and set up Docker, Kubernetes and Jenkins CI/CD, reducing deployment time from hours to minutes.

Tech: Java 17, Spring Boot 3, Microservices, Kafka, Redis, PostgreSQL, gRPC, Docker, Kubernetes, Jenkins, Flyway, Angular, JUnit, Mockito
Sellify AI — AI-powered sales optimisation platform for campaigns and multi-channel automation.

- Built microservices for targeted customer campaigns with GPT-4-powered personalisation in a Kanban-based team.
- Implemented Twilio, SendGrid and Shopify integrations for automated multi-channel messaging and engagement workflows.
- Managed DevOps with GitHub Actions, AWS EC2, RDS Aurora PostgreSQL and S3; applied Spring Security across microservices.

Tech: Java 17, Spring Boot, Microservices, AWS, PostgreSQL, Redis, React, OpenAI API, Twilio, SendGrid, Shopify, GitHub Actions

qordata — Principal Software Engineer | US-based company / Pakistan 07/2021 – 09/2022

Global HCP Engagement — Compliance-as-a-Service platform for pharma and healthcare professional interactions.

- Led engineering delivery for Spring Boot and Angular platform components supporting 1M+ users in regulated US and EU compliance workflows.
- Designed microservice architecture and integrated Okta for unified authentication/authorisation, improving onboarding by ~20%.
- Owned backend delivery, frontend modules, CI/CD improvements, AWS deployments and technical coordination for a 7-member team.

Tech: Java 8, Spring Boot, REST APIs, Microservices, Feign, PostgreSQL, SQL Server, Liquibase, Angular, Okta, Jenkins, AWS, Docker

qordata — Senior Java Developer | Karachi, Pakistan / Oman onsite 01/2017 – 06/2021

EFPIA Consent & Dispute Management — SaaS platform for European pharmaceutical compliance.

- Built and maintained consent, dispute, reporting and data-management modules using Java, JSF, Jersey, Hibernate and SQL databases.
- Automated physician data handling for Fresenius Kabi, reducing manual processing effort by ~90% using multithreading.
- Delivered client-specific enhancements for European pharma compliance workflows, including data imports, validation and reporting features.

Tech: Java 7/8, JSF, SOA, Multithreading, Hibernate, Jersey, MySQL, PrimeFaces, SQL

qordata — Associate Consultant | Karachi, Pakistan 09/2014 – 12/2016

- Contributed to Aggregate Spend / Open Payments compliance platforms with backend enhancements, reporting workflows, Spotfire Web API integration and user-management modules.

SIDE PROJECTS

HanCraft (hancraft.tech) — Part-Time Product Builder | Independent 2025 – Present

- Building small SaaS-style tools and automation prototypes for QR workflows, waiting lists, pharmacy stock tracking and local-business operations.
- Experimenting with agentic AI workflows using Claude AI, Spec Kit, OpenAI API, Google AI Studio (Gemini), Python scripting and RPA-style automation.

EDUCATION

Master's in Computer Science — University of Karachi, Pakistan | 2013 – 2014

Bachelor's in Statistics — University of Karachi, Pakistan | 2011 – 2012

LANGUAGES & INTERESTS

Languages: English (C2) · Urdu (Native) · German (A1, learning)

Interests: Chess, AI-assisted product building, travel, science and history
